GUARANTEE

PROTO tools are guaranteed to perform the work for which they are designed, and to last as long as is consistent with ordinary wear. Any tool found defective in workmanship or material, and returned to the Factory with charges prepaid, will either be replaced, repaired or credited at current prices (as deemed best by us), provided it has been used for the purpose for which the tool was designed. • Power and impact sockets are designed for power equipment, but standard thin-wall sockets are not intended for such use. Special tools not listed in our catalog or price list do not carry the regular guarantee, because they have been manufactured to the original purchaser's specifications. Also, tools that have been ground or altered in any other manner from their original design are not covered by the guarantee.

SPECIAL TOOLS

In addition to the standard tools listed in this catalog, a great many types of special tools are made for manufacturers and other tool users. Inquiries are welcomed on tools of your own specifications, required to solve production or maintenance problems. To obtain more information on standard tools, special tools or any tool problem, see your nearest PROTO tool distributor or write to our Contract Department, giving your name, position, company and company address.

NOTICE

Prices, design, finish, steel analysis and other specifications are subject to change, due to Government restrictions or other causes.

OPEN END WRENCHES—15° ANGLE

The Speedy Type—with Streamlined Shanks
and Narrow, Pear-Shaped Heads

3016—3070

Military Description: "Engineer's Pattern, 15° Head Angle, Spear Head."
Specs.: MIL-W-15751A, Type V, Style B; or GGG-W-636, Style 1 or 2, Class B.

Slim, scientifically tapered jaws reduce overall width of the pear-shaped heads to permit work in close places but are extra strong at points of greatest strain. Jaws have minimum overhang to speed seating on nut, increase strength and prevent jaw spreading. Opening bases have a radius determined for high strength. Heads have the correct thickness. Small radii where head and shank join increase useability in tight

spots. Heads project from shank at 15° angle, permitting a turning arc of only 30°. Streamlined shanks are easy on hands, speed work and enhance appearance. Perfect balance and good "feel" assure ease of handling. Great strength and toughness—giving extra life—result from use of special alloy steels, scientific grain-flow forging, and correct heat treatment. Chrome plating gives rust-proof, lustrous-appearing wrenches.

(N) Nuts Only.

OPEN END WRENCH SETS

No. 3000N Set

This set is very popular because it includes five open end wrenches in the most-used range of sizes. All opening sizes are provided from $\frac{3}{8}$ " to $\frac{7}{8}$ " by $\frac{1}{16}$ " steps. It is a fine basic set to which more sizes can be added as they are needed.

Contents

NO.	OPENING SIZES	LENGTH

Weight, 4.2 Lbs.		

TAPPET WRENCHES—15°-ANGLE HEADS

Military Specs.: MIL-W-15751A, Type XI; or GGG-W-636, Type X.

3400G

Have best length for general use, 10", which provides good leverage, keeps hands away from hot manifolds, and still permits use in close quarters. Heads give good service without spreading. Wrench openings cover tapets, screws or lock nuts without excessive overhang, making them easier and faster to use. They are forged from fine alloy steel.

12-POINT BOX WRENCHES

The Safety Type—with Strong, Thin Box Walls for Maximum Clearance

1120—1164

Military Description: "Box Wrench, Double Head, 12-Point, 15°." **Specs.:** MIL-W-15751A; or GGG-W-636, Type I and II, Style A (Nos. 1120L-1131L and 1133-1164) and Style B (Nos. 1120-1131).

Thin but very strong box walls and resulting compact heads permit use in close quarters. Walls are thinner at the wrench tip than at the shank end of the box where greater strength is needed. Box openings are beveled for easy placement over a nut or bolthead. Small radii where the head and shank join give more clearance and increase the useable arc. Streamlined shanks provide comfortable grip, eliminate excess weight and allow long use without fatigue. Good balance and "feel" also make them easy to handle. These box wrenches are

forged from special alloy steels and scientifically heat treated to give the desired strength, toughness and hardness. Modern manufacturing produces uniform, high-quality wrenches with accurate openings, which speed work and reduce wear. Chrome plating gives a bright, rust-proof finish.

Heads are offset 15° from shank to clear objects and to protect hands.

BOX WRENCH SETS

No. 1100K Set

A fine basic set of five double-end box wrenches in the most-used range to which you can add more sizes as they are needed. All opening sizes are provided from 3/8" to 7/8" by 1/16" steps.

Contents

NO.	OPENING SIZES	LENGTH
1122L	$\frac{3}{8}" \times \frac{7}{16}"$	$7\frac{5}{8}"$
1126L	$\frac{1}{2}" \times \frac{9}{16}"$	$8\frac{3}{8}"$
1130L	$\frac{9}{16}" \times \frac{5}{8}"$	$8\frac{7}{8}"$
1135	$\frac{11}{16}" \times \frac{3}{4}"$	$11\frac{1}{4}"$
1140	$\frac{13}{16}" \times \frac{7}{8}"$	$13\frac{7}{8}"$
2405	Vinyl Kit, 10"x15"	
Weight, 2.1 Lbs.		

No. 1100M Set

This master set of ten double-end box wrenches for professional use will take care of almost all common size nuts and bolts. It includes every nominal opening size from 5/16" to 1 1/8" by 1/16" steps.

Contents

NO.	OPENING SIZES	LENGTH
1120L	$\frac{5}{16}'' \times \frac{3}{8}''$	$7\frac{3}{8}''$
1122L	$\frac{3}{8}'' \times \frac{7}{16}''$	$7\frac{5}{8}''$
1125L	$\frac{7}{16}'' \times \frac{1}{2}''$	$7\frac{7}{8}''$
1126L	$\frac{1}{2}'' \times \frac{9}{16}''$	$8\frac{3}{8}''$

2413	Vinyl Kit, 25"x18 $\frac{1}{2}$ "	
Weight, 5.2 Lbs.		

COMBINATION 12-POINT BOX AND OPEN END WRENCHES

Introduced in America by **PROTO**
The Type for BOTH Speed and Safety

Military Specs.: MIL-W-15751A, Type IV; or GGG-W-636, Type III.

These very popular wrenches—with the same opening size on each end—have all the features of both open end and box wrenches, described on preceding pages. They are forged from special alloy steel.

Use the safe box end for breaking loose a nut, turn the wrench end for end, and then use the speedy open end for running off the nut. Just reverse the procedure for running on and cinching a nut.

3340	5/8"	3/16"	5 3/4"	.12

Military Specs.: MIL-W-15751A, Type VII, Style B.

3314—3340

Both openings on each wrench are the same size. The 15° and 80°-angle heads are needed for delicate adjustments on timers, generators, radios, etc. Nos. 3336 and 3340 are for tractor and industrial use. All sizes have narrow shanks and very small fillet radii to increase their usefulness. They are forged from alloy steel.

No. 3300A Set

A highly useful set of nine electrical-type midget open end wrenches with nine opening sizes. Contents at right.

NO.	OPEN. SIZES	LGTH.	NO.	OPEN. SIZES	LGTH.

Weight, .41 Lb.					

Note: For STANDARD Nut and Bolt Sizes, Corresponding to NOMINAL Wrench Openings, See Chart Opposite Page 64.

OFFSET BOX WRENCHES

Military Description: "Box Wrench, Double Head, 12-Point, Double Offset." **Specs.:** MIL-W-15751A, Type II, Style A (Nos. 8180-8185) and Style B (Nos. 8160-8163).

Designed to reach nuts and boltheads in counterbored places, casting depressions and other restricted spots where usual

wrenches cannot be used. Heads are offset 45°, providing needed height for many jobs. Thin box walls allow maximum clearance.

Forged from special alloy steel and properly heat treated for extra strength and toughness.

Primarily for assembly and repair of fluid and gas lines, these wrenches have countless uses in automotive, aviation, air conditioning, refrigeration, plumbing and industrial work. They are used on hydraulic units, air brake systems, service station equipment, compressors, instruments, etc. A modified 12-point design saves chewing of soft metal nuts and fittings. Nine gripping points and deep walls prevent slippage.

STILLSON-PATTERN PIPE WRENCHES

**Military Specs.: GGG-W-651,
Type I (Normal Duty).**

NO.	LENGTH	MAXIMUM PIPE SIZE	WT., LBS.
806	6"	1 1/2"	.32
808	8"	3/4"	.65

716S	16"	17/8"	Semi	3.4
720S	20"	21½"	Semi	5.9

Forged from fine alloy steel, these wrenches are strong—though thin and light to permit faster work.

The five full-finish wrenches are highly polished and then chrome plated to prevent rust and enhance appearance. The seven semi-finish wrenches have polished heads.

Absence of a corner lip on the movable jaw (in most sizes) allows a square nut to fit flat against the inside jaw surface, resulting in greater strength, better adaptability to different size nuts, and elimination of "knuckle busting" due to slippage.

Two cost savers are the 16" size, which does the work of usual 15" and 18" wrenches, and the 20" size, which replaces usual 18" and 24" wrenches.

Striking wrenches have a square striking shank for use in restricted quarters with a sledge or hammer. They are offset to allow maximum clearance. These wrenches are necessary for tightening and loosening large bolts and nuts. Like all of the heavy-duty PROTO industrial wrenches, they are noted for their great strength, being forged from PROTO-specified alloy steels. Although strong enough for extra heavy duty, they are streamlined to reduce unnecessary weight.

Heavy-Duty Spud-End 12-Point Box Wrenches

Military Description: "Structural Wrench, Box, 12-Point, Single End, Offset Handle." Specs.: MIL-W-15751A, Type XB.

You will note an innovation in this wrench, as a real safety factor has been introduced. It is a combination box wrench with tapered spud handle, which makes quick work of loosening frozen or corroded bolts or nuts. The spud end is very handy for aligning holes in flanges. Note the clearance provided by the offset head which overcomes the usual clearance problems. These wrenches are ideal for construction, refineries, etc. Forged from alloy steel, they are extra strong.

(B) Bolt Heads Only. (N) Nuts Only.

PROTO means **PRO**fessional **TO**ols

HEAVY-DUTY INDUSTRIAL WRENCHES

Short Type

Long Type

Slugging Wrenches — 12-Point Box Type

Military Specs.: MIL-W-15751A, Type XIII, Style A (Short Type, Nos. USN221-256) and Style B (Long Type, Nos. USN326-356).

Industrial slugging box wrenches are designed for all types of heavy industrial work where the working space is extremely limited or highly congested. The 12-point opening fits snugly upon the bolt or nut and will remain in position while being struck with heavy hammer or sledge. These wrenches are a boon to shipbuilders (for installing or repairing machinery in ships), diesel power plants, railroad repair shops, oil refineries and other plants with heavy machinery. They are forged from PROTO-specified alloy steel.

Heavy-Duty Double-End 12-Point Box Wrenches

Safety engineers and workers whole-heartedly endorse these wrenches. They are made stronger in the neck, or offset, but without increasing the thickness between the broached opening and the under side of the offset. The crescent-shaped neck is not only stronger but will work in closer places. High-pressure flanges and castings with ribs or bosses adjacent to bolt holes are examples of work where minimum rear wall thickness is valuable. They are forged from alloy steel.

3/4" DR. IMPACT SOCKET WRENCHES

For Description and Illustration of These Sockets, See Top of Opposite Page.

POWER OR HAND SOCKET WRENCHES

PROTOLOY alloy steels and advanced design provide these power sockets with great strength, toughness, snug fit, freedom from slipping, and maximum clearance for speed and ease in handling. All of these features combine to give long life and a high safety factor.

They fit Black & Decker, Chicago Pneumatic, Ingersoll-Rand, Thor and other makes of power tools and wrenches. They also fit regular socket wrench handles and attachments, and therefore are ideal for

many jobs demanding strength greater than provided in regular manual sockets.

PROTO power sockets are used extensively by all types of manufacturers for assembly and maintenance work, and are noted for their outstanding performance. They are popular also with mechanics for tractor, truck, bus and car repairing.

The very complete line includes a wide variety of opening sizes and socket types in five drive sizes—providing the right power socket for practically every need.

PROTO TOOLS
REG. U.S. PAT. OFF. LOS ANGELES MADE IN U.S.A.

1/4" SQ. DR. MIDGET SOCKET WRENCHES

Military Specs.: MIL-W-15838A, Type I, Class 1, Style A; or GGG-W-641, Table 2.

Only Midget Tools can do fast, efficient work on intricate jobs—you should have a complete 1/4" Square Drive assortment.

4706-4709

4710

4708S-4710S

4708L-4709L

4710L-4714L

4744-4745

4737-4738

4737L-4738L

4770

Midget sockets save time and trouble on little jobs that ordinary sockets can't handle, such as the repair of carburetors, distributors, radios, instruments, etc. They are accurately made from alloy steels for super strength—and scientifically heat treated to insure long, dependable service.

3/8" SQ. DRIVE CUB SOCKET WRENCH HANDLES AND CROWFOOT WRENCHES

Military Specs.: MIL-W-15838A. Lengths subject to individual requirements.

Handles and attachments permit a great number of assemblies. The ratchet is light, trouble-free, long-lived and reversible at flip of lever. Hinge handles, noted for strength and versatility, have hole for inserting pin handle to make a tee or ell attachment. The sliding bar handle provides good leverage with the plug at the end or can be used as a tee handle. Speed handles are for fast running of nuts and bolts.

1/2" SQUARE DRIVE STANDARD SOCKET WRENCH HANDLES AND SPRING TESTER

Military Specs.: MIL-W-15838A. Lengths subject to individual requirements.

No. 5449 Reversible Ratchet

Strong, light, thin and free of trouble. Reversible at flip of lever. Length, 10 $\frac{1}{4}$ ". Weight, 1.28 Lbs.

No. 5450 Reversible Ratchet

Extra long to give added leverage. Length, 16". Weight, 1.82 Lbs.

Parts for Ratchets 5449 and 5450

5449C Cover 5449R Reversing Assembly
 5449DL Dog, Left
 5449DR Dog, Right 5449S Spring
 5449H Cover Screw 5449W Wheel with Plug

Hinge Handles

Three for you to choose from. All up-set knurled handles, drilled with pin hole. Slender shanks for lightness and balance.

5466 Length, 10". Weight, 1.16 Lbs.

5467 Length, 15". Weight, 1.56 Lbs.

5468 Length, 18". Weight, 1.67 Lbs.

No. 5300PH Pin Handle

For deep sockets. Length, 8". Stock, $\frac{3}{8}$ ". Weight, .25 Lb.

No. 5466PH Pin Handle

A handy little bar to be used with any extension or hinge handle with pin hole. Length, 11 $\frac{1}{2}$ ". Stock, $\frac{3}{8}$ ". Weight, .35 Lb.

No. 5485 Sliding Bar Handle

Friction ball holds plug in any position. Used as a tee or offset handle. Length, 13". Weight, .94 Lb.

No. 5486 Ell Handle

Where real leverage is required the ell handle is tops. Length, 14". Weight, 1.36 Lbs.

No. 5405 Spring Tester

This tester, with a torque wrench, measures valve and clutch spring recoil pressures. It provides a fast, accurate means for matching sets of springs—to increase power and efficiency of engines. Wt., 8.8 Lbs.

Each Tester Has Full Instructions

No. 5447 "Ratchetor" Ratcheting Attachment

Converts any $\frac{1}{2}$ " drive non-ratcheting handle or attachment into a ratcheting device. Used mainly with a hinge handle, hinge handle plus extension, speed handle or torque wrench. A simple, positive device, huskily built for high torque strength yet compact for

ample clearance. Has very little backdrag. Ratchet has 34 teeth, providing positive engagement every 10 $\frac{1}{2}$ degrees. Reversing lever acts directly on pawl, eliminating separate cam mechanism and possible misalignment or malfunction. Weight, .73 Lb.

1/2" SQUARE DRIVE STANDARD SOCKET WRENCH HANDLES AND ATTACHMENTS

No. 5469 Speed Hinge Handle

Combines the features of a speeder and a hinge handle. Ball-bearing knurled grip. Diameter of swing, 7". Length, 18". Stock, $\frac{3}{16}$ ". Weight, 1.80 Lbs.

No. 5480 Speed Handle

Nothing finer for the speedy running on or off of nuts. Ball-bearing knurled grip. Diameter of swing, $7\frac{1}{2}$ ". Length, 18". Stock, $\frac{1}{2}$ ". Weight, 1.52 Lbs..

Extensions

Provide necessary clearance for socket wrench handles on many jobs and thereby increase their usefulness. All have a hole for turning with pin handle, except 5460.

- 5460 Length, $2\frac{1}{2}$ ". Weight, .24 Lb.
 5461 Length, 5". Weight, .36 Lb.
 5463 Length, 10". Weight, .64 Lb.
 5464 Length, 18". Weight, 1.07 Lbs.

No. 5470 Universal Joint

Makes your job easier when working at a difficult angle. Has $\frac{1}{2}$ " square drive male and female connections. Length, $2\frac{1}{4}$ ". Weight, .18 Lb.

Screwdriver Sockets

For use on drag links and on any large slotted screws. Can be turned by most $\frac{1}{2}$ " drive handles and attachments.

NO.	BIT SIZE	LENGTH	WT., LBS.
5444	$\frac{3}{4}$ "x.115"	$1\frac{9}{16}$ "	.14
5446	$1\frac{5}{16}$ "x.154"	$1\frac{9}{16}$ "	.20

Adapters

Permit the turning of $\frac{1}{2}$ " square drive socket wrenches with $\frac{3}{8}$ " and $\frac{3}{4}$ " drive handles and attachments. Also allow use of $\frac{1}{2}$ " drive handles and attachments for turning $\frac{3}{8}$ " and $\frac{3}{4}$ " socket wrenches.

NO.	DESCRIPTION	LENGTH	WT., LBS.
5253	$\frac{3}{8}$ " Female, $\frac{1}{2}$ " Male	$1\frac{3}{32}$ "	.07
5254	$\frac{1}{2}$ " Female, $\frac{3}{8}$ " Male	$1\frac{5}{16}$ "	.10
5653	$\frac{1}{2}$ " Female, $\frac{3}{4}$ " Male	$1\frac{1}{2}$ "	.22
5453	$\frac{3}{4}$ " Female, $\frac{1}{2}$ " Male	$1\frac{7}{8}$ "	.40

The handles and attachments shown on this page and the preceding page are designed, engineered and manufactured for precise and complete interchangeability. With them, you can make a wide range of combinations for special jobs. Their accurate drive ends insure close fitting. All of them are made from special alloy steel.

1/2" SQ. DRIVE SOCKET WRENCH SETS

5400AB

No. 5400C Set

A high-utility, low-cost set with 13 items:

NO.	DESCRIPTION
5414	Socket, 7/16" Op.
5416	Socket, 1/2" Op.
5418	Socket, 9/16" Op.
5420	Socket, 5/8" Op.
5422	Socket, 11/16" Op.
5424	Socket, 3/4" Op.
5426	Socket, 13/16" Op.

NO.	DESCRIPTION
5428	Socket, 7/8" Op.
5430	Socket, 15/16" Op.
5432	Socket, 1" Op.
5466PH	Pin Handle, 11 1/2"
5467	Hinge Handle, 15"
5494	Steel Box, 17"x3"x2"
Weight, 5.8 Lbs.	

No. 5300B Deep Socket Set

Includes nine 1/2" drive 12-point deep sockets—Nos. 5340, 5341, 5343, 5344, 5345, 5347, 5348, 5349 and 5351—with openings of 1/2", 9/16", 5/8", 11/16", 3/4", 13/16", 7/8", 15/16" and 1". Packed in cardboard box. Weight, 3.4 Lbs.

No. 5300E Spark Plug Socket Set

No. 5300PH pin handle and six deep sockets—Nos. 5343, 5344, 5347, 5348, 5349 and 5351—with openings of 5/8", 11/16", 13/16", 7/8", 15/16" and 1". Packed in cardboard box. Weight, 2.8 Lbs.

No. 5400AB Set

A popular set, containing 17 items:

NO.	DESCRIPTION
5414	Socket, 12-Point, 7/16" Opening
5416	Socket, 12-Point, 1/2" Opening
5418	Socket, 12-Point, 9/16" Opening

3/4" SQUARE DRIVE HEAVY-DUTY SOCKET WRENCHES AND ATTACHMENTS

These sturdy fine alloy steel tools are used by mechanics and industrial workers who need strength, power, speed and safe operation on really tough jobs. They are essential for the maintenance and installation of heavy machinery and for the repair of trucks, buses, automobiles, tractors and farm implements. An outstanding feature of these sockets, which saves time and money, is their extra length.

(B) Bolt Heads Only. (N) Nuts Only.

★ For 6-Point Power Sockets, See Pages 16-22.

No. 5526S Socket

Special 4-point (single square) socket with 13/16" opening. Fits all Budd dual wheels and Lambert spacers as used on many truck models, and Budd dual wheel inner nut on 1935-1948 Dodge 1 1/2 and 2-ton and 1931-1948 Ford 1 1/2-ton trucks. Length, 2". Inside clearance, 1 1/16". Outside diameter, 1.562". Weight, .72 Lb.

No. 5670 Universal Joint

3/4" male and female connections. Length, 3 5/16". Weight, .96 Lb.

Adapters

These adapters make it possible to turn 3/4" square drive socket wrenches with 1/2" and 1" handles and attachments, and to use 3/4" drive handles and attachments for turning 1/2" and 1" drive socket wrenches.

PLIERS

Among the many styles and sizes of pliers available in the extensive PROTO tool line, you can find the right ones for any job. And you are assured of getting high quality.

Skilled workmen, with the aid of modern equipment, forge and machine these pliers to high standards. Long life is insured by their sturdy construction and by the use of fine high-grade steels.

When you examine these pliers you will find many superior features—the result of years of experience in plier design. They are easy to work. They have good balance—good “feel.” They have correct leverage. Gripping teeth are shaped properly. Sharp cutting edges are perfectly matched and built to withstand hard use. Patterned handles are shaped to fit the hand, giving a sure grip.

201-202

203

204 & 206

207

209

Nos. 201 & 202 Thin Nose Slip Joint Pliers

Designed with a slim nose to reach into tight places. Have two jaw-opening adjustments and shear-type wire cutter. Handy for all automobile owners and mechanics. Two sizes.

NO.	LENGTH	WEIGHT
201	5"	.25 Lb.
202	6"	.35 Lb.

No. 203 Thin Bent Nose Slip Joint Plier

Made with 30° offset thin nose which reaches into many places inaccessible with straight nose pliers. Handy for pulling small nails and staples. Very useful around home. Has two jaw-opening adjustments and wire cutter of shear type. Length, 7". Weight, .43 Lb.

Nos. 204, 206 & 207 Diagonal Cutting Pliers

Thin, narrow jaws work easily in congested places. Sharp cutting edges are perfectly matched and withstand hard usage. Useful for switchboard, telephone, ignition and other electrical work.

NO.	LENGTH	WEIGHT
204	4½"	.20 Lb.
206	6"	.31 Lb.
207	7"	.46 Lb.

No. 209 Heavy-Duty Diagonal Cutting Plier

A powerful cutting plier, designed with the box joint close to the short jaws to provide great leverage. Cuts heavy wire with little effort. Sharp cutting edges are perfectly matched. Every mechanic needs this plier. Length, 7". Weight, .49 Lb.

PLIERS

No. 215 Brake Spring Plier

Curved jaw clears edge of brake shoe to bring it in close adjustment with center line of spring. Thin hooked jaw slips easily under spring. A necessary plier for auto mechanics. Length, 12". Weight, .61 Lb.

215

No. 218 Angle Nose Battery Plier

Thin jaws at 30° angle make terminal nuts easily accessible. No matter what condition the nuts or bolts are in, the gripping jaws take a sure hold. Length, 8". Weight, .40 Lb.

218

No. 226 Needle Nose Side Cutting Plier

The long thin nose and the strong, sharp side cutters make an ideal combination for radio, telephone and other electrical work. A good long-reach plier. Length, 6". Weight, .28 Lb.

226

No. 227 Duck Bill Plier

A useful plier for carburetor, radio, refrigerator, electrical typewriter, office machine and many other types of work. Long handles provide powerful leverage. Length, 8". Weight, .31 Lb.

227

No. 235 Slip Joint Ignition Plier

Designed for ignition work but has many other uses where narrow jaws are needed. Light and convenient to use. Has three jaw-opening adjustments. Length, 4½". Weight, .06 Lb.

235

Nos. 236 & 238 Parrot Nose Wrench Pliers

Combination plier and pipe wrench design, with 75° offset nose and four jaw-opening adjustments. Noted for great gripping power. Ideal for many uses, especially pipe and tubing work.

NO.	LENGTH	WEIGHT
236	6"	.41 Lb.
238	7½"	.61 Lb.

236-238

No. 239 Wrench Plier

A popular type, with long, slim 20° offset nose and three jaw-opening adjustments. Jaws hold objects in front of center, giving a powerful gripping action. Length, 8". Weight, .54 Lb.

239

Nos. 240 & 241 General Utility Pliers

All-purpose pliers, with five jaw-opening adjustments. Teeth are shaped as in a pipe wrench, insuring positive grip on round objects.

NO.	TYPE DUTY	LENGTH	WEIGHT
240	Heavy	9½"	.58 Lb.
241	Light	9½"	.52 Lb.

240

PLIERS

243

No. 243 Multiple-Groove Joint Utility Plier

A curved tongue-and-groove type of joint holds the jaws securely in any desired position and takes strain off of bolt. Five grooves provide a wide range of openings for handling hundreds of jobs. Length, 9½". Weight, .81 Lb.

246

No. 246 Comb. Slip Joint Side Cutting Plier

A well-made plier that cuts most wire and nails with ease. Has two jaw-opening adjustments. Length, 6". Weight, .49 Lb.

250

No. 250 Lock Ring & "Horseshoe" Washer Plier

A money-saving dual-purpose plier, for spreading both soft iron "horseshoe" lock washers used on auto brakes and contracting-type tempered steel lock rings used on shafting to locate bearings, gears, etc. Length, 8". Weight, .33 Lb.

257

No. 257 Heavy-Duty Universal Plier

A curved jaw grips objects of almost any shape. Other jaw is grooved for gripping wire, etc. Has a shear-type wire cutter and two jaw-opening adjustments. Length, 7". Weight, .58 Lb.

258

No. 258 Gas Plier

For studs, tubing and pipe. Handles two tube size ranges. Jaw ends have lengthwise tube-gripping teeth. Length, 8". Weight, .62 Lb.

260

No. 260 Long Thin Nose Telephone Plier

Popular for telephone work and for radio installation and repair. Long thin nose gets into tight places. Has powerful shear-type wire cutter. Length, 6". Weight, .25 Lb.

266-268

Nos. 266 & 268 Lineman's Side Cutting Pliers

For utility linemen's work but used also for wiring and electrical equipment installation and maintenance. Useful, too, around filling stations and garages. The sharp edges stand hard usage.

NO.	LENGTH	WEIGHT
266	6"	.43 Lb.
268	8"	.81 Lb.

275-280

Nos. 275-280 Slip Joint Pliers

Leaders for general utility, design and service. Have two jaw-opening adjustments and a shear-type wire cutter. Four sizes.

NO.	LENGTH	WEIGHT	NO.	LENGTH	WEIGHT
275	5"	.26 Lb.	278	8"	.50 Lb.
276	6"	.41 Lb.	280	10"	.88 Lb.

"BET'R-GRIP"® SCREWDRIVERS

® Registered U. S. Pat. Off.

Plastic-Handle Regular Type with Standard Bit

Plastic-Handle Cabinet Type with Straight Bit

Wood-Handle Regular Type with Standard Bit

There are many reasons for the great popularity of these screwdrivers. Blades are made from fine alloy steels and are scien-

tifically heat treated their entire length.

Plastic handles feature a revolutionary hand-fitting shape with a large diameter to provide a "big handful" and resulting powerful grip. Extra deep flutes prevent hand slippage and screwdriver rolling. A large bearing surface on the outer handle end allows great pressure with the palm. The plastic is non-explosive, does not burn readily, is a good insulator, and has great toughness and high impact strength.

Favorites for years are the sure-grip, octagon-shaped wood handles. The seasoned hardwood handle is protected on most types by a ferrule and a steel cap.

MORE JOBS WITH FEWER PULLER PARTS

Many puller lines are so designed that a special puller is needed for every type of job, requiring an enormous investment. If you standardize on PROTO pullers, you can take care of almost all jobs with a relatively few parts. The reason is that **these puller parts are interchangeable**.

For example, a light-duty two-jaw puller can be converted into a three-jaw type by adding a three-way yoke, pin and jaw.

Either a two-jaw or three-jaw light-duty puller can be quickly changed to a slide-hammer type by replacing the screw with

a T-handled rod and hammer. Likewise, the slide-hammer puller can be converted to a light-duty type by adding one screw.

This same screw is used in PROTO medium-duty pullers, so a light-duty puller can be changed to a medium-duty type by adding a crossarm and two jaws.

Regular heavy-duty jaws can be replaced by cap screw or timing gear jaws. All of these jaws are for inside or outside pulling.

In buying pullers, remember that parts interchangeability means more jobs with fewer parts—and less cost to you.

UNIVERSAL WHEEL HUB PULLER

This puller is the simplest and fastest made for hubs and many other pulling requirements. It pulls hubs of most light trucks and cars, including Ford (by using adapter shown). The No. 4001J legs are drilled for $\frac{9}{16}$ " studs and are quickly adjustable to any drum with 3, 4, 5, 6 or 7 studs in a circle up to $6\frac{1}{2}$ "-diameter. The No. 4001JT legs accommodate

larger $\frac{3}{4}$ " studs and are adjustable on drums in a circle up to 8".

LIGHT-DUTY PULLERS

These small pullers are designed to pull little gears, pulleys, bearings, etc., quickly and easily. The narrow jaws get into very close places. Adjusting nut No. 4063 holds the jaws firmly in position so they can't slip. If adjusting nut No. 4056N is substituted, the short jaws can be reversed and used for inside pulling. Any $\frac{1}{2}$ " opening wrench can be used on the screw's hex head. The short jaws have a range from 0" to $1\frac{1}{2}$ ", and the long jaws from 0" to 3".

The parts included in the No. 4060A two-way puller and the No. 4070C three-way puller are shown in the two right columns of the table below.

All puller parts listed on Pages 42-47 are made from special alloy steel.

MEDIUM AND HEAVY-DUTY PULLERS

For all types of bearings, sprockets, gears, pulleys, wheels, hubs, parts, etc. Quick-change jaws don't require set screws or other locking devices. Preferred straight line, full capacity pulling is possible at any width or depth within each puller's size range. With no linkage or pins to adjust, the pullers are easy to set up.

4020C

For Harmonic Balancer Assemblies, Timing Gears, etc.

4020A

4010B

4030B

4022T

4022TS

Standard Tip Small-Diam. Tip

Detachable "live center" screw tips do not rotate when a screw is turned, preventing expensive shaft damage, keeping the screw on center, relieving screw strain and retaining better puller alignment.

maintenance departments in many industries. Makes an extremely large number of puller set-ups, due to parts interchangeability, and handles hundreds of pulling operations. Weight, 52 Lbs.

NO. SD6 "PULLERMART"

A master puller set with new type of storage rack for garages, other repair shops and industrial plants that use all types of pullers. Clearly labeled individual parts of basic sets are arranged on the rack in "exploded" fashion and are located in proper order for assembly. With this system, the interchangeable parts can be used in a great many set-ups, eliminating the need for a large number of costly special pullers. Five sections enclose 59 parts for four basic pullers, plus a group of 22 useful pulling tools. Outlines and numbers facilitate replacement of tools after use. The 3'x5½' rack of ⅝" plywood has an easel back. Weight, 119 Lbs.

SPECIAL-PURPOSE PULLERS

Stud Removers and Setters

4515 & 4532

Wedge type stud removers and setters—adaptable to both power and hand tool use—have been proved in service to be far superior to the eccentric roller type. They give long service, handle very short studs ($\frac{3}{4}$ " for the No. 4515), and have a small turning radius which clears many obstructions that would block operation of other types. The tapered, deeply-serrated wedges grip tighter as pressure is applied and take a firm hold on stubborn studs. Each unit has two wedges to increase the usable range. A spring-tensioned pin holds the wedges in the body when not in use. No. 4515 is $1\frac{3}{16}$ " in diameter and $3\frac{1}{2}$ " long. No. 4532 is 2" in diameter and $5\frac{1}{8}$ " long.

STANDARD $\frac{1}{2}$ " SQUARE DRIVE			
NO.	DESCRIPTION	FOR STUDS	WT., LBS.
4515	Stud Remover	$\frac{1}{4}$ "- $\frac{5}{8}$ "	.78

4533	Thick Wedge Only	$\frac{5}{8}$ "- $\frac{3}{4}$ "	.34
4534	Thin Wedge Only	$\frac{3}{4}$ "-1"	.18

Battery Terminal and Bearing Pullers

4041

Wt., .65 Lb.

Remove terminals quickly and easily, without damaging posts. No. 4041, a conventional type, can be used for small bearings and other jobs. No. 4042, an unusual type, costs less and is faster to set up and use.

4042

Wt., .44 Lb.

All puller parts listed on Pages 42-47 are made from special alloy steel.

No. 4043 Steering Wheel Puller

Designed to remove drilled and tapped steering wheels, but ideal for many other cap screw pulling jobs. Holds two diametrically opposed cap screws, or three screws spaced 120° apart. Rotatable screw

tip is cut away to prevent interference with horn button wiring. Weight, 1.03 Lbs. Parts: Body—4043B. Screw with Tip—4043S. Tip Only—4043T.

No. 4080 Blind Bearing Puller

A simple, efficient collet-type puller for pulling Chevrolet, Ford and Packard pilot bearings quickly and without damage. Turning the screw expands outer shoulder and grips bearing. Has an exceptional range of expansion and therefore has many uses. Can be used alone or with a No. 4056 slide-hammer puller. Length, $4\frac{1}{2}$ ". Weight, .34 Lb. Parts: Body—4080B. Screw—4080S.

No. 4082 Wheel Bolt Inserter and Peener

For installing new wheel attaching bolts in rear axle flanges of Chevrolets. With this tool you can replace a bolt in $\frac{1}{6}$ th the usual time because it makes removal of rear axle and other parts unnecessary.

Screwing tool onto a new bolt with countersunk end toward flange pulls bolt tightly into position. Eccentric end peens shoulder of bolt into space provided on flange. Length, $1\frac{3}{8}$ ". Weight, .17 Lb.

SPECIAL-PURPOSE TOOLS

No. 1730 Obstruction Box Wrench

For turning nuts where obstructions prevent easy access with straight wrenches, and especially useful on many starters. Clearance at middle, 1". Openings, 12-point, $\frac{9}{16}$ " x $\frac{5}{8}$ ". Length, $6\frac{1}{32}$ ". Alloy steel. Weight, .20 Lb. More sizes on Page 11.

Brake Adjusting Tools

No. 2006 adjusts star nuts on two-shoe Bendix brakes. It is $8\frac{1}{2}$ " long, has $1\frac{5}{8}$ " spoons and weighs .30 Lb. No. 2007 is for Chevrolet brakes and other close places. It is $6\frac{15}{16}$ " long, has $1\frac{3}{16}$ " and $1\frac{7}{16}$ " spoons and weighs .18 Lb. Both are alloy steel.

No. 2151 Wheel Lug Nut Wrench

A speedy, four-way rim wrench, forged from fine steel.

Hex openings of $\frac{5}{8}$ ", $\frac{3}{4}$ ", $1\frac{1}{16}$ " and $\frac{7}{8}$ " fit lug nuts of most cars and trucks. Length, 18". Weight, 3.0 Lbs.

No. 2301 Muffler Removal Tool

A practical, simple and inexpensive tool for removing mufflers and tailpipes. Easy and safe to use. Makes quick work of taking off worn-out mufflers that are corroded, burned and hard to reach. Prevents damage to usable parts. Forged from special alloy steel. Length, $6\frac{1}{8}$ ". Weight, .29 Lb.

No. 2316 Piston Ring Compressor

Sturdy, ratchet-type—noted for easy, trouble-free operation. Wideband ($3\frac{1}{2}$ ") completely encircles the rings, expands to 5", contracts to $2\frac{3}{16}$ ", and has corrugated edge. Two narrow bands take strain. Bottom band prevents flaring and possible ring breakage as rings leave compressor. Dual ratchets synchronize operation of bands, prevent band breakage and eliminate slip-page. Diameter is compressed .003" per tooth. A simple trigger device positively locks or releases ratchets and bands. Spindle has $\frac{1}{4}$ " square opening and is turned by an ell handle, furnished with each compressor. Weight, .85 Lb.

No. 2335 Valve Guide Cleaner

Turning a nut adjusts the five flexible blades to any valve guide size. Length, $9\frac{3}{4}$ ". Weight, .10 Lb. Extra blade—2335B.

No. 2336 Gasket Scraper

For removing shellacked gaskets, scraping carbon and many other uses. Length, $11\frac{1}{32}$ ". Blade width, $1\frac{1}{2}$ ". Weight, .39 Lb.

No. 2337 Flexible Carbon Scraper

Sliding band regulates the flexibility of the ten round spring steel blades. Length, 9". Width, 1". Weight, .30 Lb.

SPECIAL-PURPOSE TOOLS

Heavy-Duty Screwdriver Sockets

For drag links and screw adjustments on steering assemblies, shock absorbers, starters, etc. Other types—Pages 23 and 25.

NO.	DRIVE	BIT SIZE	LGTH.	LBS.
5244	$\frac{3}{8}$ "	$\frac{5}{8}$ "x.116"	$1\frac{1}{4}$ "	.08
5444	$\frac{1}{2}$ "	$\frac{3}{4}$ "x.115"	$1\frac{9}{16}$ "	.14
5446	$\frac{1}{2}$ "	$1\frac{5}{16}$ "x.154"	$1\frac{9}{16}$ "	.20

Connecting Rod Sockets

Thin nose, hexagon, $\frac{1}{2}$ " drive sockets. No. 6523 is for Ford V8 con. rod nuts. No. 6522 is for La Salles and Cadillacs.

NO.	OPENING	LENGTH	WT., LBS.
6522	$\frac{7}{16}$ "	$1\frac{5}{8}$ "	.13
6523	$\frac{9}{16}$ "	$1\frac{5}{16}$ "	.11

No. 6525 Cylinder Head T-Handle

Speeds turning of V-type engine head nuts with $\frac{1}{2}$ " drive sockets. Weight, 3.9 Lbs. Parts: Extension, 30" Long, of $\frac{5}{8}$ " Non-Twisting Stock—6525E. Pin Handle, 18" Long, $\frac{9}{16}$ " Stock—6525P.

Carburetor Jet Wrenches

Turn jets quickly, without damaging soft jet material. No. 6526 (Wt., .07 Lb.) fits Holley and Chandler-Groves carburetors. No. 6528 (Wt., .06 Lb.) fits nearly all Stromberg carburetors.

6526

6528

No. 6539 Ford V8-85 Valve Lifter

Long leverage breaks loose the toughest guides. Push guide down to remove keeper, and then pry to force out the guide. Stock, $\frac{3}{4}$ ". Length, 30". Weight, 3.5 Lbs.

The screwdriver of Valve Adjuster No. 6734 and all other tools on this page are made from PROTO-specified alloy steels.

No. 6545 Ford Drag Link and Shock Arm Tool

A real time saver—better known as the "pickle fork." Tapered fork of slim design is readily inserted to separate shock links and tie rods. Length, 16". Fork opening, $2\frac{1}{32}$ ". Weight, 2.3 Lbs.

No. 6546 Pitman Arm Pry Bar

Eliminates need for expensive pullers to remove Pitman arms from steering assemblies. Equally useful for removing gears, bearings and pulleys, and for lifting cylinder head blocks and heavy assemblies. Length, 20". Fork opening, $1\frac{1}{4}$ ". Weight, 2.8 Lbs.

No. 6601 Starter Wrench

For Plymouth, Dodge, DeSoto and Chrysler cars. Clears objects when removing or replacing starter. Has $\frac{5}{8}$ " box opening. Length, $9\frac{3}{4}$ ". Weight, .35 Lb.

No. 6734 Valve Adjuster

For accuracy, speed and ease when adjusting overhead valves. Using a $\frac{1}{2}$ " drive socket wrench, first loosen lock nut. Then operate screwdriver for adjustment, setting valve clearance with feeler gauges. Also used with clutch adjusting machines. Weight, .33 Lb. Extra Screwdriver Blade with Knob—6734S. Extra Socket-Holding Spring with Screw—6734H.

FEELER GAUGES AND GAUGE SETS

Standard Feeler Gauges

Of superior quality, these thickness gauges are accurately ground and correctly heat treated to remain true after long use.

Nine short blades—003, 004, 005, 006, 008, 010, 012, 015 and 018—in 000C holder. Wt., .10 Lb.

No. 000AA Standard Feeler Gauge Set

A master set, with all 25 short blades—0015 through 040—in 000C holder. Wt., .20 Lb.

No. 000B Step-Cut Gauge Set

Four gauges—004/6, 006/8, 008/10 and 010/12—in 000C holder. Wt., .06 Lb.

No. 000BB Step-Cut Gauge Set

Master set, with eight gauges—004/6 through 011/13—in 000C holder. Wt., .08 Lb.

Ten $\frac{3}{16}$ " wide by $1\frac{1}{2}$ " long blades—.011", .012", .014", .018", .020", .022", .025", .028", .032" and .035" thick—in holder. Wt., .03 Lb.

No. 000D Ignition Gauge Set

Blades not sold separately.

No. 000E Brake Gauge Set

Nine $\frac{3}{16}$ " wide by 4" long blades—.006", .008", .010", .012", .014", .016", .018", .020" and .025" thick—in holder. Wt., .04 Lb.

Blades not sold separately.

No. 000K Spark Plug Gauge Set

For checking spark plug gaps. Eight bent-wire gauges—.022", .025", .027", .028", .030", .032", .035" and .040" thick—in holder. Wt., .06 Lb.

Gauges not sold separately.

HACKSAWS, BARS AND BENDING TOOL

No. 344 Low-Clearance Hacksaw

All metal. For use where high frame won't work. Takes 10" blades. Weight, .88 Lb.

No. 352 Adjustable Hacksaw

A heavy-duty polished and plated frame with many fine features. Pistol-grip handle, of durable red plastic, is at an angle and shaped to fit the hand. Takes 8", 10" or 12" blades, which can be set in four different positions. Weight, 1.62 Lbs.

No. 360 Adjustable Hacksaw

Inexpensive, but sturdy and serviceable. Pistol grip handle. Weight, 1.20 Lbs.

No. 2110 Grease and Utility Bar

For lube work, but fine for pulling up floors and other jobs. Offset wrench-like opening clears objects. Teeth prevent slipping. Forged from PROTO-specified alloy steel. Length, 28". Weight, 3.4 Lbs.

Conventional-Type Pry Bars

For countless prying and aligning jobs. Forged from special alloy steel and correctly heat treated for extra strength.

NO.	STOCK	LENGTH	WT., LBS.
2116	1/2" Octagon	16"	.72
2120	5/8" Octagon	18"	1.20
2124	3/4" Octagon	24"	2.4

No. 2135 Adjustable Bending Tool

Arms far apart.
Handle at angle.

Arms close together.

Arms far apart.
Handle upright.

Adjustable to over 100 positions, this efficient bending bar has a multitude of uses. It handles many otherwise difficult jobs because it operates with small handle swing, and it saves buying the assortment of solid bars used in shops.

It is ideal for bending and aligning bumper brackets, frame horns, pillars, rods, front ends and steering parts. In automotive work it is used for spreading springs, straightening steering arms and tie rods, aligning parts, and lifting heavy assemblies. In farm implement repair it is useful for holding, aligning and shaping of tool bar standards, brackets, and harrow and cultivator frames.

Length, 36". Weight, 14 Lbs. Parts: Body Only — 2135B. Handle — 2135H. Lower Arm—2135L. Upper Arm—2135S.

Body and both arms are of alloy steel.

Rolling Head Bars

New type gear bar, with 90° rolling head. One of the handiest types of bars you can own, having a great many uses. Especially valuable for getting into close places, such as behind gears. Forged from alloy steel.

NO.	STOCK	LENGTH	WT., LBS.
2126	1/2" Octagon	16"	.86
2130	5/8" Octagon	18"	1.62

REFLEX-TYPE TORQUE WRENCHES

PROTO flat beam reflex torque wrenches are noted for their production speed with laboratory accuracy and for their control by **THREE** senses—feeling, sound and sight. By employing the nerve system and its instantaneous, automatic (involuntary) reflex muscular reactions, the control method is faster than thought. At the instant the preset reading is reached, a strong impulse is im-

parted to the hand and a loud click is sounded, causing automatic release. These two controls, plus an easy-to-read dial, permit work in noisy places, in blind spots, in bad light and under other adverse conditions. Reflex torque wrenches speed factory production, inspection, lab tests and repairs to cars, trucks, tractors, etc. Because of their accuracy, they also eliminate dangerous strains, breakage, binding, loosening, chatter, leakage, squeaks and stripped threads. The sturdy, one-piece flat beam measuring element is permanently accurate and practically indestructible. Both foot-pound and inch-pound models are available—six sizes in each model.

SOFT-FACE HAMMERS

No. 1368 Rubber Mallet

A general utility mallet, especially useful for sheet metal, plastic parts, painted surfaces and other easily damaged objects. Neoprene synthetic head is tough, non-flaking, highly oil resistant, and long-lived. Distinctive hour-glass shape provides large $2\frac{5}{8}$ " striking faces. Length, 15". Weight, 1.46 Lbs.

No. 1383 Plastic-Tip Hammer

Resilient plastic protects surfaces and parts. Has $1\frac{9}{32}$ " round removable tips. Weight, .76 Lb. Tips Only: Round Type—1370C. Cross Pein Type—1370D.

No. 1430 Brass Hammer

One of the finest soft hammers ever designed. Weight, 1.75 Lbs.

No. 1448 Two-Way Hammer

A very useful combination hammer, with a steel head on one end and a rubber head on the other end. The ideal hammer for mounting tires and drawing rivets. Also used by plumbers, machinists and woodworkers. Length, 17". Weight, 2.6 Lbs.

1448B—Extra Rubber Head for Two-Way Hammer No. 1448. Weight, .28 Lb.

NUPLAFLEX PLASTIC-TIP HAMMERS

**Ideal for Surfaces and Parts That Would be Marred,
Scratched or Otherwise Damaged by a Metal Hammer,
and Having Over**

1,000 Uses

Complete hammers include two with soft tips and ten with tough tips—consisting of five pairs (the two in each pair having same head size but different weights). Extra tips—in tough, medium and soft grades—are for replacing worn-out tips and making all-purpose hammers with two types of tips. Nuplaflex hammers offer many advan-

tages over rawhide, brass, lead and other plastic types. They are perfect for use on threads, soft metal, fenders, tires, leather, furs, and painted, polished or plated surfaces.

The revolutionary plastic used—Nuplaflex—has these important features: (1) Recovers original shape when bent, dented or cut; (2) Doesn't flake off under hard blows; (3) Lasts many times longer than most other types; (4) Positively safe from explosions; (5) Tips and heads are non-sparking and safe around explosive fumes; (6) Won't burn readily unless held in flame (Approved by Underwriters' Laboratories); (7) Oil and grease resistant; (8) Absorbs sting-causing vibration; (9) Has minimum rebound, reducing fatigue and speeding work.

Tips are anchored securely by an automatic locking device but are easy to detach. The streamlined head design is another feature.

BODY AND FENDER HAMMERS

No. 1416 Long Head Bumping Hammer

Provides extreme clearance for late model fenders. Weight is decreased and perfect balance achieved by means of a semi-I-beam. Head length, 9". Clearance, $6\frac{3}{4}$ ". Weight, 3.3 Lbs.

No. 1419 Magnetic Trim Hammer

A favorite because of its long reach and head radii. The head is curved in the arc of a natural swing. Length of head, $5\frac{1}{2}$ ". Weight, .55 Lb.

No. 1421 Dinging Hammer

Has large face for roughing the bad ones into shape for finishing. Head is 6" long, with $1\frac{1}{4}$ " and $1\frac{5}{8}$ " round faces. Faces are slightly crowned. Weight, 1.00 Lb.

No. 1424 Finishing Hammer

Light in weight and perfectly balanced. Has slightly crowned $1\frac{1}{4}$ "-diameter round face, and a $1\frac{1}{16}$ " square face. Weight, .64 Lb.

No. 1425 Finishing Hammer

Heavier than 1424. Has slightly crowned $1\frac{1}{2}$ "-diameter round face, and a $1\frac{1}{8}$ " square face. Weight, .90 Lb.

These hammers are forged from special alloy steel and are designed to speed and simplify repairs. They have good balance, and proper weight and clearances. Handles (listed on Page 53) are of tough second-growth hickory.

No. 1426 Long Body Finishing Hammer

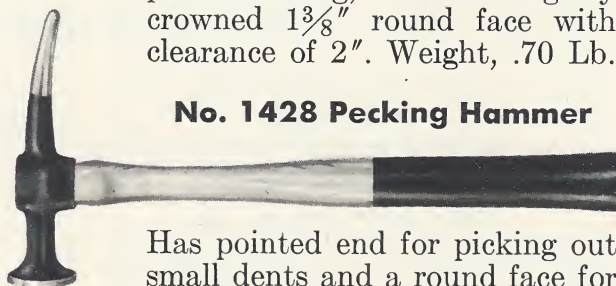

For crowned fenders and other places where clearance is needed. Has slightly crowned $1\frac{3}{8}$ "-diameter round face with $3\frac{1}{2}$ " clearance, and a round cross pein, $1\frac{1}{8}$ " wide, with 4" clearance. Weight, 1.03 Lbs.

No. 1427 Finishing Hammer

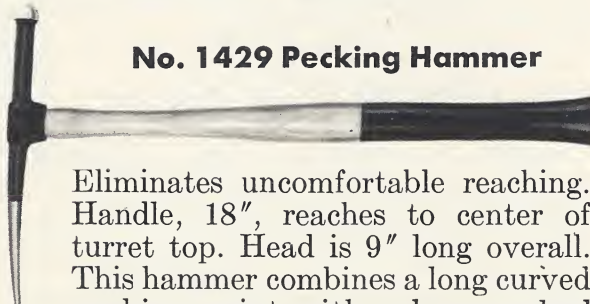

Has wedge shaped 1"-wide cross pein with $2\frac{1}{2}$ " clearance. Used for fender beads, corner along panel beading, etc. Has slightly crowned $1\frac{3}{8}$ " round face with clearance of 2". Weight, .70 Lb.

No. 1428 Pecking Hammer

Has pointed end for picking out small dents and a round face for finishing. Head is $5\frac{7}{8}$ " long overall. Slightly crowned round face is $1\frac{1}{2}$ " in diameter. Weight, .86 Lb.

No. 1429 Pecking Hammer

Eliminates uncomfortable reaching. Handle, 18", reaches to center of turret top. Head is 9" long overall. This hammer combines a long curved pecking point with a long-necked round pein. Weight, .88 Lb.

BODY AND FENDER TOOLS

1452

1454

1457

1453

1455

1458

All Dollies Are Forged of Alloy Steel, Hardened and Tempered, and Polished on Working Surfaces. They Maintain Smooth Surfaces Over Long Periods.

No. 1454 Radius Dolly

Useful design, with many radii. One side and bottom are flat for dinging flat surfaces. Both ends high crowned. Size, $1\frac{3}{32}$ " x $2\frac{3}{16}$ " x $4\frac{1}{2}$ ". Weight, 2.9 Lbs.

No. 1455 Bead Dolly

Another popular dolly, used for beads or flanges on fenders. Flat side works under long curve of fender. Thin edge is useful for corners and beading. Size, $1\frac{7}{8}$ " x $2\frac{29}{32}$ " x $4\frac{7}{16}$ ". Weight, 2.4 Lbs.

No. 1457 Shrinking Dolly

The unique shape and low crown make this dolly ideal for shrinking body metal, and for raising beads and molding. Size, $1\frac{1}{4}$ " x $3\frac{1}{16}$ " x $3\frac{5}{16}$ ". Weight, 2.2 Lbs.

No. 1458 Semi-Elliptical Heel Dolly

Provides two flat and two crowned working surfaces. Very useful in restricted places. Suitable for shrinking metal. Size, $1\frac{3}{16}$ " x $2\frac{3}{8}$ " x $3\frac{1}{4}$ ". Weight, 2.2 Lbs.

No. 1526 Panel Cutting Chisel

A rugged alloy steel ripping chisel that eliminates replacement of delicate cutters. Length, 14". Weight, 1.14 Lbs.

1411

1412

1413

Wood Paddles for Making Solder Fills

Treated for smooth flow.

NO.	WORKING AREA	LENGTH	WT., LB.
1411	Flat, $1\frac{1}{16}$ " x $3\frac{1}{4}$ "	$7\frac{3}{4}$ "	.11
1412	Curved, $1\frac{1}{16}$ " x $3\frac{1}{4}$ "	$7\frac{3}{4}$ "	.09
1413	Flat, 1 " x $3\frac{1}{4}$ "	$7\frac{3}{4}$ "	.09

No. 1400SP Solder Paddle Set

Three paddles listed above. Wt., .40 Lb.

No. 1501 Flexible Flat Straight File

Fast cutting type for all kinds of body, fender and sheet metal work. Has curved teeth on both sides. Length, 14". Width, $1\frac{3}{8}$ ". Weight, .70 Lb.

No. 1509 Adjustable File Holder

Made of aluminum, this fender file holder is light but strong. Simple adjustment makes file convex, concave or flat. Length, 16". Weight, 1.86 Lbs.

PUNCH AND CHISEL SETS

No. 2 Set

A fine selection, providing the twelve punches and chisels used most frequently in practically all types of work. Includes Center Punch $41\frac{3}{8}$; Rivet or Pin Punches $47\frac{1}{4} \times \frac{3}{32}$, $47\frac{5}{16} \times \frac{1}{8}$ and $47\frac{3}{8} \times \frac{3}{16}$; Starting Punches $50\frac{3}{16}$, $50\frac{5}{16}$ and $50\frac{3}{8}$; Cape Chisel $72\frac{5}{16}$; Diamond Point Chisel $76\frac{5}{16}$, and Cold Chisels $86A\frac{1}{4}$, $86A\frac{3}{8}$ and $86A\frac{7}{16}$ in a red Vinyl Kit No. 2402. Weight, 1.62 Lbs.

No. 3 Set

A useful set, including Center Punch $41\frac{3}{8}$; Rivet or Pin Punches $47\frac{5}{16} \times \frac{1}{8}$ and $47\frac{3}{8} \times \frac{3}{16}$; Starting Punch $50\frac{5}{16}$, and Cold Chisel $86A\frac{1}{2}$ in Vinyl Kit No. 2411. Weight, .97 Lb.

No. 47A Set

A useful, complete set of seven rivet or pin punches. Includes $47\frac{1}{4} \times \frac{1}{16}$, $47\frac{1}{4} \times \frac{3}{32}$, $47\frac{5}{16} \times \frac{1}{8}$, $47\frac{5}{16} \times \frac{5}{32}$, $47\frac{3}{8} \times \frac{3}{16}$, $47\frac{7}{16} \times \frac{1}{32}$ and $47\frac{1}{2} \times \frac{1}{4}$ in red Vinyl Kit No. 2403. Weight, 1.14 Lbs.

SCREW AND PIPE EXTRACTORS

How to Use

First Drill Hole.

These extractors are the fastest type obtainable for removing broken screws, studs, bolts, pipe, fittings, etc. They are vastly superior to other designs for several reasons: (1) Only three, quick steps are required. (2) Even if hole is drilled clear through, extractor will not chew up object as do other types. (3) Sharp edges bite positively. (4) Gradual taper of flutes prevents wedging and binding. (5) Objects with right or left threads may be removed. (6) Special alloy steel provides long life. You will save precious time and your good disposition on many occasions by getting all nine sizes.

Then Drive in Extractor and Turn Out Broken Object.

9500A

†For Broken Alemite Fittings.

No. 9500A Screw Extractor Set

Five popular-size extractors—Nos. 9521, 9522, 9523, 9524 and 9525—with a handy rack for holding all five sizes. Weight, .26 Lb.

PLUMBING TOOLS

In addition to these specialized tools, you will find a great many others in this catalog that are needed for plumbing, heating, ventilating and air conditioning work. Among them are pipe wrenches; flare nut and adjustable wrenches; box, open end and combination wrenches; punches; chisels; pliers; screwdrivers; gear and bearing pullers; ham-

mers; pry bars; tool chests, boxes and kits; and socket wrench sets in $\frac{1}{4}$ ", $\frac{3}{8}$ ", $\frac{1}{2}$ " and larger drives.

132L-132R

All are forged from fine alloy steel. Yarning irons are slightly offset for clearance. Long calkers, for calking lead in hub of soil pipe, are ground both inside and out, and their concave blades fit 4" pipe. Water main calkers are ground square, have an offset handle for knuckle clearance, and do a fast job of calking joints in cast iron mains. Left and right calkers are for use near walls or in corners.

"TOOLMOBILE"® MOBILE TOOL CABINETS

Featuring Interchangeable Drawers

You'll be mighty proud when you own a gleaming, sturdy "Toolmobile"—true mark of a professional tool user. Saving hours by taking needed tools to the job, and preventing tool losses, a "Toolmobile" soon pays for itself.

Biggest feature is the interchangeability of drawers. Easy-to-move drawer runners, that fit into notches spaced every 2" from top to bottom, permit any of three basic sizes of drawers to be arranged in any combination. Three types of assemblies are available.

MORE BIG "TOOLMOBILE" FEATURES

1. Ruggedly constructed of heavy-gauge welded steel.
2. Critical points strongly reinforced. Round corners, extra heavy channels across bottom (through which caster plates are bolted), double side walls, hemmed drawer edges and midfront stiffener assure rigidity and proper drawer alignment.
3. Shallow drawer, 21 $\frac{5}{8}$ "x16"x1 $\frac{1}{2}$ " deep (inside), has perforated sections which can be punched out to form holes for drawer divider bolts.
4. Medium drawer, 21 $\frac{5}{8}$ "x16"x3 $\frac{1}{2}$ " deep (inside), has "punch-out" bolt holes and reinforced bottom.
5. Deep drawer, 21 $\frac{5}{8}$ "x16"x5 $\frac{1}{2}$ " deep (inside), has "punch-out" bolt holes and reinforced bottom.
6. Drawer divider set has two rigid slotted sides and four strong partitions which fit into slots to form various-sized compartments.
7. Four-roller drawers move at finger's touch. Double-supported roller axles take heavy load.
8. Drawers do not open easily when cabinet is moved.
9. Semi-soft, tough rubber, 5" casters on husky ball-bearing swivel plates—each held by four bolts—roll easily and quietly, and reduce tool jarring.
10. Two casters have handy foot-operated brakes.
11. Single-lock front closes entire cabinet. Folds and slides out of way under top when unlocked.
12. Masonite cover on 18"x28" top provides excellent working surface and protects cabinet and tools.
13. Rail around three sides of top keeps tools from rolling off and holds socket wrench racks.
14. Two 15" handles make cabinet easy to maneuver.
15. Useful light assembly has flexible gooseneck that reaches over front for lighting drawers, a chrome plated reflector, two outlets and an 8' cord.
16. Finish is lustrous red, with smart chrome trim.

Individual "Toolmobile" Parts

- 9968-1 Shallow Drawer and Runners. Wt., 8.0 Lbs.
- 9968-2 Medium Drawer and Runners. Wt., 9.8 Lbs.
- 9968-3 Deep Drawer and Runners. Wt., 12 Lbs.
- 9968-4 Drawer Divider Set. Wt., .90 Lb.
- 9968-5 Complete Light Assembly. Wt., 4.4 Lbs.
- 9968-6 Door for Bottom Half. Wt., 4.7 Lbs.

ALL-PURPOSE TOOL CHESTS

Both No. 9997 and No. 9990 are top quality tool chests—designed for professional tool users. They should not be confused with cheaper chests of inferior construction on the market.

Great strength and rigidity are secured by the use of heavy-gauge sheet steel, welded construction and reinforcing (9997 has double-walled sides and double-reinforced bottom and top).

Designed for maximum utility of space, there are no wasted areas in

either chest. Strong, telescope-action slides make the drawers easy to move. Side handles have a comfortable grip and are attached to husky baseplates.

Both chests have a durable red finish and corners are rounded to give a streamlined appearance. A card entitles every owner to a free nameplate bearing his name.

No. 9997 Master Tool Chest

This chest has many features that make it strong, safe, convenient and good-looking. It has two large drawers— $23\frac{1}{4}" \times 10\frac{3}{4}" \times 2\frac{3}{4}"$ deep (inside)—each divided into two sections by a sturdy welded partition, and four small drawers— $11\frac{1}{8}" \times 10\frac{5}{8}" \times 1\frac{1}{4}"$ deep (inside), each partitioned into three compartments. A $21\frac{11}{16}" \times 8\frac{1}{16}"$ tote tray, with a rigid non-tilt handle, is included for carrying tools to the job. It has three compartments, two of them suitable for sockets. The top section of the chest has three large compartments, one for holding the tote tray. The double-rib reinforced top overlaps the balance of the chest to make a tight seal. It is supported on a full-length, heavy-duty, piano-type hinge. A one-piece drop front covers all drawers when the top is lowered and swings inside the lid when the chest is opened. A strong tumbler lock secures the entire chest in three places. Dimensions, $27" \times 12" \times 15"$ high. Weight, 70 Lbs.

9997

No. 9990 Master Tool Chest

With provisions for both midget and very large tools, this chest is noted for its versatility. It has two small drawers— $3\frac{3}{4}" \times 10\frac{5}{16}" \times 1\frac{5}{16}"$ deep (inside), one medium drawer— $16\frac{9}{16}" \times 10\frac{1}{8}" \times 2\frac{1}{16}"$ deep (inside), a larger drawer— $20\frac{9}{16}" \times 10\frac{1}{8}" \times 2\frac{1}{4}"$ deep (inside), and a large tool compartment in the top half— $24\frac{1}{8}" \times 11\frac{1}{16}" \times 7"$ deep (inside). A $23\frac{1}{8}" \times 5\frac{7}{8}" \times 1\frac{3}{8}"$ deep (inside) tray has compartments for sockets and other small tools. It swings up and out of the way when the lid is opened. A raise front covers the bottom drawers and slides under the drawers when not in use. This front and the top lid can be padlocked to a strong hasp, securing the entire chest. Dimensions, $24\frac{1}{2}" \times 11\frac{1}{2}" \times 13\frac{1}{8}"$ high. Weight, 37 Lbs.

9990

TOOL CHESTS AND SOCKET RACKS

No. 9989 Master Tool Chest

Made of sheet steel, welded and riveted; dark red baked enamel finish. Hinged tray swings up with lid. Removable tray gives easy access to large interior.

Overall dimensions: 9" deep, 11½" wide, 20½" long. Hinged tray 1¼" deep, 5½" wide, 19" long. Front tray 1½" deep, 5½" wide, 19" long. Compartment 6" deep, 11" wide, 20" long. Fixed tray in top space 2½" deep, 4¾" wide, 20" long. Each tray and bottom compartment have separate section for sockets or small tools. Heavy hasp fits over staple on hinged front to lock chest securely. Strong folding handles. Weight empty, 20 Lbs.

9989

No. 9980 Utility Tool Chest

22¼" long, 9" wide, 6½" high, with drop front and drop handles at each end. Dark red wrinkle finish. Heavy-gauge steel. Weight empty, 11 Lbs.

9980

Socket Racks

Made with clip on back, which slips over edge of box or partition. Can be carried on side of tote tray or can be put in a convenient place on wall or bench. Sockets fit firmly on rack. Made of heavy sheet steel, dark red baked enamel finish.

No. 5297—Cub Socket Rack, 18¼" long; has 17 clips for sockets with ⅜" square drive. Weight, .53 Lb.

No. 5497—Standard Socket Rack, 19¼" long; has 17 clips for sockets with ½" square drive. Weight, .62 Lb.

5297 & 5497

STEEL TOOL BOXES FOR SOCKET SETS

5894

All socket set boxes are made of sturdy heavy-gauge steel and have red baked enamel finish.

No. 5894 Extra Heavy-Duty Tool Box

For 1" square drive extra heavy-duty and $\frac{3}{4}$ " drive heavy-duty sockets, handles and attachments. Made extra heavy throughout — welded, riveted and strongly reinforced. Dimensions, 30"x8 $\frac{1}{4}$ "x5". Weight, 21 Lbs.

5695

No. 5695 Heavy-Duty Tool Box

For $\frac{3}{4}$ " drive heavy-duty sockets, handles and attachments. Construction throughout is extra heavy. Has five convenient compartments. Cover is held shut by two spring catches and a padlock hasp. Handle folds out of way when not in use. Dimensions, 22 $\frac{1}{2}$ "x8"x3 $\frac{3}{4}$ ". Weight, 7.4 Lbs.

5495

No. 5495 Standard Tool Box

For $\frac{1}{2}$ " drive standard sockets, handles and attachments. Die-formed one-piece construction, reinforced edges and rounded corners all add strength. Has two socket compartments, speeder holder in lid, spring hasp, and husky handle on side. Dimensions, 19 $\frac{3}{16}$ "x7 $\frac{1}{4}$ "x2". Weight, 3.9 Lbs.

5494

No. 5494 Junior Standard Tool Box

A smaller box than No. 5495, but has room for a large number of $\frac{1}{2}$ " drive standard sockets and a few handles and attachments. Dimensions, 17"x3"x2". Weight, 1.86 Lbs.

5295

No. 5295 Cub Tool Box

For $\frac{3}{8}$ " drive cub sockets, handles and attachments. Strength is increased by die-formed one-piece construction, end reinforcing flanges and rounded corners. Has socket compartment and a spring hasp. Dimensions, 17 $\frac{7}{8}$ "x5 $\frac{1}{4}$ "x1 $\frac{3}{8}$ ". Weight, 1.83 Lbs.

5294

No. 5294 Junior Cub Tool Box

Smaller than No. 5295. Holds large number of $\frac{3}{8}$ " drive cub sockets and a few attachments. Dimensions, 10 $\frac{1}{4}$ "x2 $\frac{1}{4}$ "x1 $\frac{1}{4}$ ". Weight, .83 Lb.

4795

No. 4795 Midget Tool Box

For $\frac{1}{4}$ " drive midget sockets, handles and attachments. Keeps smaller tools in orderly array and separated from others. Dimensions, 6 $\frac{3}{4}$ "x2 $\frac{1}{4}$ "x1". Weight, .52 Lb.

HIP-ROOF BOXES AND FLEXIBLE KITS

Nos. 9970 and 9971 Hip-Roof Tool Boxes

Ideal for any tool user, having room for an amazing number of tools. Made of heavy-gauge steel, with strong full-length hinges. Handy tote tray lifts out. Finish is red. Made in two sizes.

NO.	DIMENSIONS	WT., LBS.
9970	20"x6"x5 $\frac{1}{4}$ "	6.7
9971	19"x7"x8 $\frac{3}{4}$ "	9.3

No. 100HR Hip-Roof Tool Box

Handy for taking tools to job. Tote tray, which fits inside top, has socket compartment 13 $\frac{1}{2}$ " long and full-length compartment 2" wide. Box is made of heavy-gauge steel, and is 22"x7 $\frac{3}{8}$ "x8 $\frac{1}{2}$ ". Handles hold box shut while carrying. Finish is red. Weight, 10 Lbs.

Vinyl Plastic Flexible Kits for Tool Sets

These kits are the finest obtainable for storing and carrying tools. The use of vinyl plastic offers many advantages. It has amazing durability and is noted for long wear. It is flexible, won't crack or peel, is scratch and scuff proof, resists oil and grease, and is easy to clean with soap and water. The kits are red with gold marking, and they retain their new, handsome appearance. They have strongly stitched seams and heavy tie strings.

The flaps are just a little longer than the tools they are designed for, eliminating fold-under flap objections but offering protection to and from sharp tools.

NO.	WIDTH	DEPTH	POCKETS	WT., LBS.

No. 2450 Belt-Type Leather Kit

Handy for carrying tools on the job. Has four slots for holding with belt. Made of red chrome-tanned top-quality leather. Has three pockets, and is 7" wide by 9" deep. Weight, .16 Lb.

9971

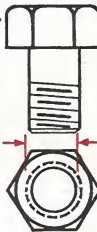

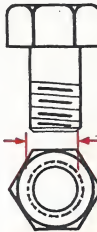

100HR

2401-2413 and 2450

Chart of Standard Bolt, Nut and Screw Sizes, Corresponding to Nominal Sizes Marked on PROTO Wrenches and Sockets

To use this chart, locate thread diameter of bolt, nut or screw in extreme left or right column. Then move across to box which has proper identification of bolt, nut or screw at top of vertical column. The size in this particular box is the nominal opening size in inches of the PROTO wrenches and sockets that will fit.
